

# **N8361 Series High-accuracy Programmable Battery Simulator**

#### **Product Introduction**

N8361 is a high performance battery simulator with power up to 180W, covering the specifications of lithium battery for consumer electronics mainstream market. N8361 supports a variety of test functions, such as power mode, charging mode, battery simulation, internal resistance simulation, SOC simulation, fault simulation, etc., to achieve a variety of battery characteristics simulation; The current flows bidirectional, and the source load state changes quickly. N8361 products can be widely used in the field of consumer electronics testing.

### **Application Fields**

- ▶ Battery protection board test
- Portable consumer electronics R&D and production, such as mobiles, bluetooth earphones, smartwatch, etc
- Power tools production test, such as electric screwdriver
- > Testing of Battery powered, small power supply such as DC-DC, wireless charging and other product
- ▶ Battery maintenance equipment testing

#### **Main Features**

- ▶ Voltage Range:0~20V
- Current Range:-10A~+10A
- ▶ Single channel power up to 200W
- ► Voltage rise and fall time ≤50µs
- ► Current Accuracy up to 1µA

- ▶ High precision DVM
- Support front and rear outlet, easier for desktop & integration
- ➤ With digital I/O supporting trigger test
- LAN/RS232/CAN Interface

### Current flowing bidirectionally to make it both a power supply and a load

The current flows in both directions. N8361 can both suck and output current, and the current is up to 10A. The output port has a switch component, and the off state disconnects the physical connection with the external loop.

▲ N8361 Two-quadrant Operation

# Variable output impedance allowing battery internal resistance simulation

N8361 has the battery internal resistance simulation function, and supports resistance value programming. The programmable range is  $0-20\Omega$ , which can emulate the variation graph consistent with the real battery internal resistance characteristics.

Schematic of Battery and N8361-12-15

# Front and rear wiring design

N8361 is equipped with banana jack at the front panel and output terminal at the rear panel, which is easy for desktop application & integration, and improves the test efficiency.

### **DVM** test function

N8361 series provides basic circuit measurement function. It has one channel built-in DVM to test external voltage. The voltage range is  $-30V \sim 30V$ , and the resolution is 0.1mV. The LCD screen will show the dynamic data, which is convenient for users to observe the voltage changes.

### **Product Dimension**

### **Technical Data Sheet**

Model	N8361-20-10		
Current	±10A/CH		
Voltage	20V/CH		
Power	200W/CH		
Channels	1CH		
CV Mode			
Range	0~20V		
Setting Resolution	0.1mV		
Setting Accuracy (23±5℃)	0.01%+3mV		
Readback Resolution	0.1mV		
Readback Accuracy(23±5℃)	0.01%+2mV		
Output Voltage Settling Time	≤10ms		
Load Regulation	0.01%		
Line Regulation	0.01%		
Voltage Ripple (20Hz-20MHz)	1mVrms		
Temperature Coefficient (0-40°C)	≤25ppm/°C		
	Current Measurement		
	Range 1		
Range	-10~10A		
Resolution	0.1mA		
Accuracy (23±5℃)	0.05%+4mA		
Temperature Coefficient (0-40℃)	≤50ppm/°C		
	Range 2		
Range	-1~1A		
Resolution	0.01mA		
Accuracy (23±5℃)	0.05%+0.4mA		
Temperature Coefficient (0-40℃)	≤50ppm/°C		
	Range 3		
Range	-1~1mA		
Resolution	0.1μΑ		
Accuracy (23±5℃)	0.05%+1µA		
Temperature Coefficient (0-40℃)	≤50ppm/°C		
Tomporature Coemoent (0-40 C)			
Tomporature Coemoent (0-40 C)	Current Protection Limit

Note 1: Load varies from 10% to 90% by full voltage output.

Note 2: Load varies from 10% to 90% by full voltage output, with voltage recovering within 50mV of previous voltage.

Note 3: For other specifications, please contact NGI.

Note 4: All specifications are subject to change without notice.
